Travis Strickler
12541 North 79th Avenue
Peoria, AZ 85381

Certification #: 44063

Congratulations on becoming ASSE Certified! Attached is your ASSE certification card; please take careful notice of the expiration date. ASSE certifications must be recertified every three years, and we encourage you to recertify in advance of the expiration date — up to six months early — to avoid lapses in your certification. For more information about ASSE recertification requirements, visit www.asse-plumbing.org/recertification.

In addition to the certification you just earned, ASSE International offers a variety of other valuable credentials, including nationally recognized certifications for backflow prevention, infection control, fire protection, service plumbing, rainwater harvesting, and more. To see our full catalog of offerings, please visit www.asse-plumbing.org/personnel-certification.

As an ASSE Certified professional, you will now begin receiving digital copies of ASSE International's Working Pressure magazine, a quarterly magazine intended to give ASSE members and certified professionals working knowledge of what's happening in our widespread and diverse industry. Learn more and read past issues at www.workingpressuremag.com.

Please note that being ASSE Certified does not automatically make you a member of ASSE International. Membership is not mandatory, but we encourage all ASSE Certified professionals to become members — especially if you'd like to participate on one of our many committees that help guide and develop ASSE standards and certification programs. It is through the support and involvement of ASSE International members that we as an organization can continue to grow and promote the importance of our motto, "Prevention Rather Than Cure." To join, go to www.assewebstore.com/membership.
